

### **Remarks**

As described in the Examiner Interview Summary mailed August 20, 2010, and requested by the examiner, the applicants have amended paragraphs [0034], [0042], [0046]-[0089], [0098]-[0100], [0102]-[0111], [0113]-[0210], [0215], and [0218]-[0235] of the specification to delete cross-references to paragraph numbers. The applicants have accomplished this by adding numerical identifiers and replacing cross-referencing to paragraph numbers with cross-referencing to the numerical identifiers. These amendments are made solely for the purpose of ensuring that the cross-referencing between paragraphs in the issued patent will be clear and identical to the application as filed, given that the issued patent will publish without paragraph numbers.

In addition, Applicants have amended claim 1 in order to remove the redundant recitations of the definitions of moieties  $Cy^2$  through  $M^2$ , which were mistakenly introduced by the examiner's amendment of July 8, 2010. These amendments were discussed with the examiner in an informal telephone conference on September 3, 2010.

No change in scope of the disclosure is intended or introduced by these amendments, and none of the amendments constitute new matter.

If it is believed that a teleconference will advance prosecution, the examiner is encouraged to contact the undersigned as indicated below.

Respectfully submitted,

/Michael S. Greenfield/
